ABOUT US

Since 2009, **Snowy Mountain Rifle Co.** has built rifle systems, in our Hamilton, MT shop, for hunters and shooters who care about first-round hits and gear that doesn't quit when the weather turns. Our rifles and components meant to be used—on ridgelines, in basins, and on the range when you're pushing distance and reading wind.

We machine, fit, and assemble critical components with the same mindset we bring to the mountains: simple, precise, and built to run. Every product we offer is selected or built around performance you can trust.

WHAT WE DO

- Complete rifle systems built for real hunting conditions.
- Actions, barrels, and components machined and fit with tight tolerances.
- Match-grade ammunition tuned for consistency and confidence.
- Long-range training rooted in practical field shooting.
- A purpose-built long-range store stocked with proven gear.

If you're the kind of shooter who checks torque values, tracks velocity, and expects your rifle to feed clean when it's dirty and cold—you're in the right place.

CUSTOM RIFLES

FULL CURL

The **Full Curl** is built for when the air gets thin and every ounce matters. It's a true mountain rifle—light in the hand, steady behind the trigger, and accurate enough to make that one chance on a sheep or goat count.

SPECIFICATIONS

ACTION: SMR F-16A Titanium

BARREL: SMR Carbon Fiber Precision Rifle Barrel

STOCK: Peak 44 Blacktooth to SMR Specs

BOTTOM METAL: SMR M5 Aluminum Flex BDL

MUZZLE BRAKE: SMR Snowflake Titanium Self-Timing Muzzle Brake

TRIGGER: TriggerTech Special

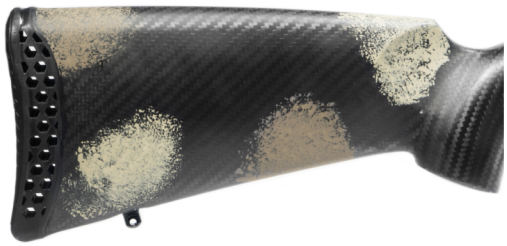

APPROXIMATE WEIGHT: 5lbs 7oz

SUGGESTED CALIBER & BARREL LENGTH:

6.5 Creedmoor: 16, 20, 22"
6.5 PRC: 16, 20, 22"
7 SAUM: 20, 22"
7 PRC: 20, 22"

STARTING AT $6,595 MSRP

CUSTOM RIFLES

ALPINE HUNTER

The **Alpine Hunter** is built for hunters who live in the steep, ugly country where most people turn around. It balances carbon, titanium, and a Manners stock into a rifle you can trust when the only rest is a rock, a pack, or your knees.

SPECIFICATIONS

ACTION: SMR F-22R Stainless Steel or Titanium

BARREL: SMR Carbon Fiber Precision Rifle Barrel

STOCK: Manners EH1 to SMR Specs

BOTTOM METAL: SMR M5 Aluminum Flex BDL

MUZZLE BRAKE: SMR Snowflake Titanium Self-Timing Muzzle Brake

TRIGGER: TriggerTech Special

RIFLE-MATCHED AMMUNITION

BUILT FOR ONE RIFLE: YOURS

Every Snowy Mountain Rifle Co. rifle undergoes an intensive load-development process before it ever leaves our shop. We spend days testing charge weights, seating depth, and component combinations on that specific rifle to find the most accurate and consistent node for your chamber, barrel, and twist.

Once proven, that data is logged to your rifle's serial number — bullet, brass, primer, powder charge, CBTO/seating depth, and chrono results. From there, you can reload the same spec yourself, or order rifle-matched ammunition from us built to that verified recipe whenever you need more.

DEVELOPED, DOCUMENTED, AND TUNED FOR YOUR RIFLE

This isn't generic "hand-loaded" ammo. Every round we load is tied to a rifle we built and verified, so what you're shooting matches what we proved on our range — the same barrel you'll hunt or compete with.

STARTING AT $225 MSRP PER 50

RIFLE ACTIONS

F-22R RIFLE ACTION

One action for every season. The **F-22R** combines an interchangeable bolt face, M-16-style extractor, dual anti-bind rails, and a split 20 MOA rail. Run it extra-light in DLC titanium or go black-nitrided steel for more mass and stability.

SPECIFICATIONS

MATERIAL: 416 Stainless Steel or Grade 5 Titanium

FINISH: Black Nitride (SS) Diamond-Like Carbon Coating (TI)

ACTION SIZE: Long Action or Short Action

COMPATABILITY: Remington 700

GUARANTEED HEADSPACE: +/- .001

THREADS: 1.0625" x 16 TPI

BOLT FACE: 223 (.390), Standard (.480), Magnum (.550)

APPROXIMATE WEIGHT:

Long Action (Stainless Steel): 23oz
Short Action (Stainless Steel): 22oz
Long Action (Titanium): 16oz
Short Action (Titanium): 15oz

STAINLESS STEEL $1,399 MSRP
TITANIUM $1,899 MSRP

HUNTER-SERIES SUPPRESSORS

Built for hunters, competitors, and long-range shooters who expect silence without compromise. Snowy Mountain Rifle Co. **Hunter-Series Suppressors** are engineered for precision, reliability, and real-world use—reducing sound, recoil, and muzzle flash without shifting point of impact. Our units are machined from titanium, sub-sonic and magnum-rated, and field-tested in the conditions we hunt in ourselves.

SPECIFICATIONS

MATERIAL: Grade 5 & 9 Titanium

FINISH: Diamond-Like Carbon Coating

NOISE REDUCTION: Up to 40 dB

B.E.A.R. PRE-FIT PRECISION RIFLE BARRELS

PERFORMANCE & VERSATILITY

Top shooters run pre-fits for one reason: versatility without giving up consistency. Swap chambers when the season, match, or mission changes—and keep your rifle running like it should.

Snowy Mountain Rifle Co. **B.E.A.R. Pre-Fit Precision Rifle Barrels** are cut and chambered for repeatable headspace and clean, reliable bolt feel. We build for a wide range of action manufacturers that guarantee headspace on their actions

STAINLESS STEEL STARTING AT $659 MSRP
CARBON STARTING AT $999 MSRP

THE B.E.A.R. DIFFERENCE

A pre-fit is only as good as the indication and chamber that created it. That's why every Snowy Mountain Rifle Co. **B.E.A.R. Pre-Fit Barrel** goes through our proprietary **Barrel Examination Axis Review (B.E.A.R.)** process before it ever leaves the shop.

B.E.A.R. is our in-house method for indicating and chambering that locks onto the barrel's true axis and holds tight tolerance, repeatable alignment from setup to setup. The result is what you feel on the bolt and see on paper: smoother chambers, consistent headspace, and repeatable accuracy you can trust when it counts.

Built by machinists with decades behind the lathe. Verified before it ships. **Nothing leaves our facility without passing B.E.A.R.**

SNOWY MOUNTAIN RIFLE CO.

snowymountainrifles.com | (406) 546-8732

BOTTOM METALS & MAGAZINES

BOTTOM METALS

Built for clean feeding and a solid interface between action and stock. Three models in aluminum, unfinished or black anodized, with options for Remington 700 actions (Short, Defiance XM, Medium, and Long) and AICS setups that run most AICS and AW magazines. Short, Long, and CIP lengths.

STARTING AT $179

M5 AICS KITS

A straightforward path to a lightweight, detachable-magazine system. The all-aluminum M5 AICS bottom metal pairs with a magazine kit and is built to accept a wide range of AICS-sized magazines—simple, reliable, and ready for hard use.

STARTING AT $379

FLEX SYSTEM KITS

Versatility without chasing zero or consistency. Using the same bottom metal body, the Flex System lets you switch from BDL to magazine-fed in minutes, then convert back just as easily—built around a BDL-configured body with proprietary cuts and a tensioning system for a secure fit.

STARTING AT $359

MAGAZINES

All-aluminum 3.00" magazines built for our Oberndorf/M5 Oberndorf Flex System. Designed to fit either our SMR Oberndorf Flex System bottom metal or our M5 Oberndorf Flex System bottom metal—tight, consistent, and built to run.

STARTING AT $119

SNOWY MOUNTAIN RIFLE CO.

575 US Highway 93 N, Hamilton, MT 59840

SMR-MANUFACTURED PRODUCTS

SNOWFLAKE SELF-TIMING TITANIUM MUZZLE BRAKES

Self-timing design for fast, repeatable indexing with no shims. Cuts recoil and muzzle rise so you can spot impacts and stay on target.

STARTING AT $229 MSRP

M-LOK WEIGHT KITS

Add tunable weight to the fore-end through M-Lok. Improves balance and stability on bags or a tripod, and helps the rifle track flatter under recoil.

$79 MSRP

ACTION SCREWS

Precision-length action screws that torque consistently and protect proper bedding contact. The small hardware that keeps point of impact where it belongs.

STARTING AT $15 MSRP

ALL-PURPOSE RAIL SYSTEMS

A rigid, low-profile rail that gives you a dependable mounting point for bipods, tripods, and barricade work. Built to stay tight and resist flex under load.

$99 MSRP

MANNERS RAIL SYSTEM

Rail interface built specifically for Manners stocks for a clean, secure fit. Gives you a stable platform for ARCA/tripod use without fighting alignment.

STARTING AT $99 MSRP

SNOWY MOUNTAIN RIFLE CO.

575 US Highway 93 N, Hamilton, MT 59840

LONG-RANGE ACADEMY

Our **Long-Range Academy** is a **two-part Precision Rifle Hunter series** built for real hunts. We teach you to run a complete system—rifle, optic, data, and field positions—under the same variables you'll face in the mountains: wind, uneven ground, awkward angles, and time pressure. The goal is simple: **give you the tools and confidence to make an effective shot on the animal of a lifetime.**

FUNDAMENTALS CLASS

Built for shooters who want a correct foundation, not internet shortcuts. We cover rifle setup, baseline ballistic data, and the mechanics that make hits repeatable. Then we pressure-test it with prone and practical field positions so you can build confidence the right way.

DEVELOPMENT CLASS

For intermediate and advanced shooters who want their skills to hold up off the flat range. We go deeper into external ballistics, wind, and solver workflow, then apply it through hunting-style shooting problems that force clean decisions and fast corrections.

CLASSES RUN FROM MAY TO AUGUST IN HAMILTON, MT

STARTING AT $99 MSRP
